
RECYCLING CENTER ADVISORY COMMITTEE 2018 REPORT

The Peterborough Recycling Advisory Committee develops programs that support the Recycling Center's mission to protect human health, protect the environment, and conserve precious and dwindling resources through the proper and integrated management of solid waste. The PRAC launched the Green Star award program to publicly recognize businesses that promote improved environmental stewardship through their waste reduction, education practices, and commitment to adaptability. Two awards were presented at Greenerborough in 2018, with more to be presented at Greenerborough 2019. Future projects we are planning to explore include compost utility, reuse of mobility assistance devices, and collaborating with other environmentally oriented groups, such as the Drawdown Spoke of the Economic Development Authority's Hub and Spoke Ecosystem.

Thanks,

Eddie Gomez II, PRAC chair
